

# StarLine S96

2019/20

Kraftfahrt-Bundesamt  
08-21852 Flensburg

**StarLine S96** is a professional OEM super-upgrade **CAN-BUS** vehicle security system with **2CAN/2LIN**, **BluetoothSmart**, and **GSM** interfaces. Designed for the contemporary user, who does not want any additional aftermarket fobs; the system is fully integrated with the vehicle's factory fob and provides additional owner authentication options via smartphone, smart BT tag, and/or PIN code entered on dash buttons (any or all).

In addition to the factory key, the system can be controlled via 'StarLine GSM Telematics' **free smartphone app**. for **Apple iOS**, **Android**, & **Windows Phone**; voice and text commands; smartwatch; and online via browser.

StarLine S96 can be upgraded with a **GPS-GLONASS** receiver for a full '**Connected Car**' package with free lifetime subscription to high-precision **tracking and monitoring satellite services**; see: [www.starline.online](http://www.starline.online).

Join **#ConnectedCarsUK** with StarLine's GSM/GPS-GLONASS advanced automotive telematics. Control your vehicle's security and comfort features from anywhere in the world, receive security breach notifications and status updates to your smartphone, view event histories, track the vehicle on a live-map 24/7, set geofences, use **SmartDriving™** and **SmartDiagnostics™** services, and lots more!

## #StarLineUK

StarLine offers **multilayer protection** and will safeguard against **all known methods of theft**, including (but not limited to):

- Carjacking
- Physical key theft
- Keyless Entry System hacking (relay attack)
- Key cloning via OBD-II
- Code interception
- Towing, jacking-up (catalytic converter theft)
- Controlled Area Network shutdown
- GSM signal jamming

### Smart Owner Authentication

The system will identify its owner and remove driving prohibition via one or several chosen methods: smartphone, BT smart tag, and/or a PIN code on OEM dash buttons.

### Smart Engine Immobilisation

1. Digital-iCan™ (via CAN-BUS)
2. Standard-Analogue (via 12V relay)
3. Wireless-Analogue (via R6/R6ECO relays)
4. Coded-Analogue (via R4 relay)

### Smart Engine Remote Start

Start / stop your vehicle's engine remotely via CAN-BUS with StarLine iKey™ keyless transponder bypass technology. Check your vehicle's iKey compatibility at [can.starline.ru](http://can.starline.ru).

**FlexibleLogic™** algorithms allow StarLine-approved technicians to implement bespoke solutions for individually-tailored features, considering any particular vehicle's inherent vulnerabilities and the owner's unique security and comfort needs.

**Interfaces:** 2xCAN, 2xLIN, BluetoothSmart, microUSB, GSM, GPS-GLONASS (optional).

**Architecture:**  Monoboard |  Modular

**Owner authentication:** Personal smartphone, PIN code on OEM dash buttons, StarLine smart tag. (any combination of the above).

**System control:** OEM fob, StarLine smart tag, StarLine GSM Telematics mobile app., smartwatch, browser, voice call, text message.

**Engine immobilisation:** CAN-BUS, standard analogue, coded analogue, wireless analogue.
